Professional Summary

Motivated and adaptable backend developer with a strong passion for problem-solving and continuous learning. Skilled in building scalable and efficient backend systems using TypeScript and NestJS, with hands-on experience managing relational and non-relational databases such as PostgreSQL, MySQL, and MongoDB. Committed to delivering clean, secure, and maintainable code that drives impactful results.

Technical Skills

Languages & Frameworks: TypeScript, NestJS

Databases: PostgreSQL, MySQL, MongoDB

Version Control: Git, GitHub

API Development: RESTful APIs, Authentication & Authorization (JWT)

Others: ORM (TypeORM), Node.js, Express.js, Deployment (Render, Railway)

Projects & Experience

User Management API

Developed a secure RESTful API for user registration, authentication, and role-based authorization using NestJS and JWT.

Integrated PostgreSQL via TypeORM with entity relationships and validation.

Deployed backend to Render and connected to cloud database successfully.

Blog Backend System

Built a modular backend architecture handling posts, users, and authentication.

Implemented CRUD operations with NestJS and PostgreSQL.

Ensured request validation and input sanitization using class-validator.

Education

Bachelor of Science (B.Sc.) – Caritas University

Graduation Year: [2017-2021]

Soft Skills

Strong analytical and problem-solving mindset

Fast learner with growth-oriented attitude

Excellent collaboration and communication skills

Adaptable to new technologies and environments
